

Don't forget!

Checklist initial talk

Before radiotherapy begins we invite you to an exhaustive personal talk. The initial talk generally takes 1 hour or longer if necessary. The doctor looks carefully at your diagnosis and talks to you to establish the appropriate therapy measures. In the initial talk you will also receive information about possible side effects, how to treat them and how you can help to avoid and ease side effects.

Please bring the following to the first appointment:

- ✓ *health insurance card*
- ✓ *in the case of statutory health insurance: transfer*
- ✓ *doctor's letter*
- ✓ *operation report*
- ✓ *pathology report*
- ✓ *X-rays, as applicable CT/MRT scans*
- ✓ *drugs you are currently taking*

If you have any questions, just call us.
